Subject: RE: Rolling Knolls Landfill BERA and Data Gap Sampling
Richard,

I'm writing in response to your March 31, 2015 letter concerning the refined risk characterization for the Site. You are correct in noting that EPA wishes to move the Site work along as quickly as possible.

We believe, as indicated by Tanya's March 25th email, that the Group has all the information/data it needs to prepare the refined risk characterization for the Site. We understand that EPA has yet to receive the electronic data deliverables, but we do not view that as critical given that the Group should have the validated sampling results itself and does, therefore, have the sampling information needed to prepare the refined risk characterization.

EPA, nonetheless, understands that the Group is not willing to move forward with the refined risk characterization at this time. Accordingly, EPA agrees to wait for the Group to finish the data gap sampling work before directing the Group to complete the refined risk characterization for the Site.

Tanya will contact Arcadis shortly with information on additional samples needed for the data gap sampling work.

Sincerely,

Juan M. Fajardo

Assistant Regional Counsel
